ABOUT ME

Passionate Artificial Intelligence and Robotics student with a strong interest in research-driven problem solving, scientific data analysis, and intelligent system design. Skilled in machine learning, data analysis, and system development, with hands-on experience in building AI-based applications.

EDUCATION

Bachelor of Engineering (Artificial Intelligence and Machine Learning)

S.A Engineering College

CGPA: 8.45

2023 – 2027

HSC

St. Joseph's MHSS

Score: 84%

2022 – 2023

TECHNICAL SKILLS

Programming: Python, C, Kotlin

AI/ML: Machine Learning, NLP, Data Analysis

Libraries: NumPy, Pandas, Scikit-learn

Tools: OpenCV, Docker, Jenkins, Git, MySQL

Web: HTML, CSS, JavaScript, Node.js

PROJECTS

Real-Time Face Detection System with DevOps Pipeline

- Developed a computer vision system using OpenCV for real-time face detection.
- Implemented CI/CD pipeline using Docker and Jenkins for automated deployment.
- Improved system scalability through containerization.

Resume Analyzer (Full Stack Project)

- Developed a full-stack web application using React, Node.js, and Express.js.
- Implemented NLP techniques for resume parsing and skill extraction.
- Integrated MySQL for data storage and job-role matching.

AI-Based Scientific / Particle Data Analysis

- Simulated and analyzed particle collision datasets using machine learning.
- Applied K-Means and DBSCAN for clustering and anomaly detection.
- Visualized insights using Matplotlib and Plotly.

AI-Powered Intelligent Research Assistant

- Built NLP-based assistant to summarize research papers.
- Used transformer models and NLTK for text processing.
- Developed interactive UI using Streamlit.

AI-Based Fraud Detection System

- Developed anomaly detection model using Isolation Forest and Autoencoders.
- Applied SMOTE and evaluated using ROC-AUC, precision, and recall.

RESEARCH INTERESTS

- Artificial Intelligence
- Scientific Data Analysis
- Computer Vision
- Intelligent Systems
- Applied Machine Learning
- Natural Language Processing

CERTIFICATIONS

- Robotics: Basics and Advanced Concepts
- Machine Learning
- Image Processing
- Cloud Computing
- Kotlin

EXTRA-CURRICULAR

- Participated in technical workshops and innovation events
- Strong interest in robotics and UI/UX design
- Active team collaborator in academic projects
